Joint ventures are those entities over whose activities the Corporation has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions, and provide the Corporation with rights to the net assets of the arrangement. Associates and joint ventures are accounted for using the equity method and are recognized initially at cost. The Corporation's investment includes any goodwill identified at acquisition, net of accumulated impairment losses. The consolidated financial statements include the Corporation's share of the total comprehensive income and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Corporation, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Corporation's share of losses exceeds its interest in equity accounted investees, the carrying amount of that interest is reduced to Nil and the recognition of further losses is discontinued except to the extent that the Corporation has an obligation or has made payments on behalf of the investee.
